Hygienic Stainless Steel Valves

Memtech offers a wide range of 316/316L stainless steel valves manufactured for use in the Process Industries. Designed for ease of maintenance, our valves are available with connections to suit most customer specifications.

- ☉ Butterfly Valves
- ☉ Non-Return Valves
- ☉ Pressure Relief
- ☉ Valves
- ☉ Ball Valves
- ☉ Plugcocks
- ☉ Septum Point
- ☉ Sample Valves
- ☉ In-Line Sightglasses

Product Information

Hygienic Stainless Steel Valves

Butterfly Valves

We offer a wide range of manual and automatic stainless steel Butterfly Valves designed for hygienic applications within the Process Industries.

Standard sizes: 1", 1 1/2", 2", 2 1/2", 3", 4", 5", 6", 8"

Working pressures of up to 7 Bar

Optional open/close or multi position handle

Silicone seal as standard

Full range of hygienic connections

316L

Single and double acting pneumatic actuators

Optional control unit with feedback switches

Locking device

Horizontally mounted and electronically actuated alternatives available

Seal options include Silicone, Viton and EPDM

Non-Return Valves

Our Non-Return Valves have been designed for use where product return is to be prevented simply but efficiently.

Standard Sizes: 1", 1 1/2", 2", 2 1/2", 3", 4"

Full range of hygienic connections

316L

Designed for CIP operations

Lightweight spring provides positive operation at low pressure

Pressure Relief Valves

We offer this important addition to our Hygienic Valve range for uses where protection against excess pressure build-up is paramount.

Standard Sizes: 1", 1 1/2", 2", 2 1/2", 3", 4"

Full range of hygienic connections

Silicone Seal as standard

316L

Fully enclosed spring adjustable from 1 - 7 Bar pressure

Higher rate springs up to 10 Bar on application

Manual venting option

Ball Valves

Our robust Ball Valves are capable of operating to high working temperatures and pressures. They are designed for on/off and divert duties and are ideally used for chemical and water applications, such as isolation of water or compressed air.

PTFE seal as standard

Connections: Clamp or Plain Ends for OD tube as standard (BSP also available)

2-way and 3-way operation

316L

Pneumatic actuators available

Optional control unit feedback switches

Locking device

Plug Cocks

Our range of Plug Cocks includes 2-way and 3-way options for use on process lines where product requires a full bore. The 3-way option offers product flow diversion with manual control.

Standard Sizes: 1", 1 1/2", 2", 2 1/2", 3", 4"

Working pressures up to 3 Bar

Connections: RJT Male Ends as

316L

Nitrile and PTFE seals as standard
